

POTATO PLANT NUMBER:

1

Before digging up the plants:

OBSERVE and PREDICT

Compared to the other two plants, do you think this plant will have the **highest** number of potatoes (MOST), the lowest number of potatoes (fewest), or the middle amount? Tick which box you think it will be:

Highest (first place)	
---------------------------------	--

Middle (second place)	
---------------------------------	--

Lowest (third place)	
--------------------------------	--

After digging up the plants:

COUNT NUMBERS

HOW MANY potatoes (big, medium and tiny all count) came from this plant?

Number of potatoes	
------------------------------	--

OBSERVE and ESTIMATE WEIGHT

Look at the pile of potatoes.

Do you think this plant has the heaviest pile of potatoes? (The highest weight)

If you're not sure, put the potatoes into bowls and pick up the three bowls, one at a time, and observe how heavy they feel, to help you to guess.

Tick the box which you ESTIMATE is right for this plant:

Heaviest (first place)	
----------------------------------	--

Middle (second place)	
---------------------------------	--

Lightest (third place)	
----------------------------------	--

WEIGH

HOW HEAVY are the potatoes from this plant?

Weight of potatoes	
------------------------------	--

POTATO PLANT NUMBER:

2

Before digging up the plants:

OBSERVE and PREDICT

Compared to the other two plants, do you think this plant will have the **highest** number of potatoes (MOST), the lowest number of potatoes (fewest), or the middle amount? Tick which box you think it will be:

Highest (first place)	
---------------------------------	--

Middle (second place)	
---------------------------------	--

Lowest (third place)	
--------------------------------	--
